

## WP 1 – LEGAL & POLICY FRAMEWORK: SUSTAINABILITY AND INTERACTION

This work package aims to gather background information about the socio-economic, political, legal and institutional context of migration governance in the countries that are the object of our research (Greece, Italy, Germany, Sweden, Austria, Poland, UK, Turkey, Iraq and Lebanon). The WP has a threefold objective:

- It has an explanatory aim because we will identify which factors at the macro-level (constitutional structure, legal provisions, economic welfare, public policies, cultural elements etc.) can be regarded as decisive in explaining divergences in migration governance across different countries.
- It has an assessment aim because we will assess the performance of EU and national legislation, case law and policies in response to the current refugee crisis.
- It has a policy-oriented aim, because we will pinpoint potential policy responses and best practices in the management of migration.

Finally, WP1 will serve as a basis for the socio-economic and cultural, legal, policy and institutional background which contextualizes the outputs of subsequent WPs.

### **Deliverables**

- 10 country reports
- 1 comparative report
- 1 standardized dataset
