

Web conferences from the lecture hall

(Media control TYP D2)

Switch on media technology

Switch on the media technology, the lecture hall PC and the microphones. Log in to the lecture hall PC with your student or university ID GWDG domain).

Camera control

You open the camera control by clicking on the camera symbol in the lower menu bar. In this menu you can select the desired image section and switch off the camera if required.

Select preset camera position

Change image section

Here you define how fast the camera image should change when the camera section and the zoom are changed. If the value set here is too low, nothing will happen.

Presets

- Totale
- Pult
- Tafel
- Zuschauer Mitte
- Zuschauer Hinten links
- Zuschauer Hinten rechts

Speed Move

Speed Zoom

Zoom in/out

Camera icon in the menu bar

Menu bar icons: i, Jalousie, Anzeige, Audio, Mikrofonie, Zus. Mikrofonie, Kamera, Szenarien

Microphone

Use the microphones as usual. Everything that can be heard via the loudspeakers is transmitted to the PC. I.e. several microphones can be used at the same time.

Start web conference on PC

Start the web conference as usual from the lecture hall PC. Normally, the microphone source should already be correctly preset. The speaker in the web conference for the audio output should also already be selected. If this is not the case, please select the correct devices. You can determine these by trial and error if necessary, as the designations vary slightly between the individual rooms.

Scan QR code for detailed instructions and additional information.
